Understanding slot machines

All of Aristocrat's real money, gambling products are games of chance. This means that there are no playing methods or external factors that can have any effect whatsoever on whether players win or lose on a gaming machine. Each symbol that comes up is chosen randomly. It does not make a difference whether:

- You play a machine straight after someone else has had a big payout from it;
- You play a machine that has not had a big payout over a long period of time;
- You play at certain times of the day or night;
- You play on certain days of the week or
- You press the buttons a certain way.

Gaming machines are designed purely to deliver a great entertainment experience for adults who enjoy games of chance.
